## Leadership Tactics That Enable Team Success

For leaders, Emotional Intelligence accounts for 80% of the difference between the best and the rest. It's a better predictor of success than IQ, education and technical ability combined! In this webinar, we explore the primary factors of leadership success and realistic strategies that every leader can benefit from.

We start with EI, helping participants see the impact of their leadership style and how they can lead in a more steady, impactful manner. We offer best practices that will build a solid foundation.

Next we unpack perspective shifts and tactics that people leaders can use to better connect with their teams, remote teams, peers, bosses and clients, resulting in greater trust, influence and growth.

Lastly, we reveal the foundational elements that are most effective for leading divisions and organizations. Participants gain deeper insight into the specific activities and best practices that will lead their organization to greater market-share, profitability and respect.

*Ubiquity Webinars are designed to blend method and wisdom into experiential learning that will benefit participants for years to come.*

**Never Stop Growing!**
